

Position: Sr Architect / Project Manager

Job Description:

Seeking a full-time Senior Architect/Project Manager for a position within a multi-disciplinary architecture and engineering firm. Duties will focus on the architectural design of commercial projects with a heavy focus on Healthcare (Inpatient & Outpatient) and Life-Sciences. Additional projects include Government and Municipal ranging from \$300k to +\$70Mil in construction. The firm has a dedicated focus to designing sustainably minded projects. Position includes full healthcare insurance, long-term disability, bonus and 401k plan.

Required Skills:

- A professional license to practice architecture and associated degree from accredited university
- Experience and comfort leading multidisciplinary design teams and clients through the development of new buildings and renovation designs
- Detailed understanding of construction techniques and the development of final construction documents
- Experience leading client meetings and design review meetings with the architectural staff and engineering disciplines.
- A team oriented professional looking to invest and grow in their professional career.
- A strong work ethic and a drive to exceed client expectations.

Desired Skills:

- LEED Accreditation or ability to earn within 6 months.
- Experience designing inpatient and outpatient healthcare spaces compliant to IBC and ISDH.
- Strong working knowledge of Revit as a design platform.
- History of supervising in-house design staff (drafters and project architects).
- A detailed understanding of other computer applications used in a professional design office such as Photoshop, AutoCAD, and Sketchup.
